

Flinders Medical Centre

Bedford Park, South Australia

The all-new, world-class **Flinders Medical Centre** was built as a replacement for the ageing Daw Park Repatriation Hospital. **FMC** is one of the largest purpose-built medical centres in Adelaide, specialising in trauma and emergency services for the community and includes a 55-bed rehabilitation centre, a 15-bed palliative-care unit, rooftop-garden and an extra 1,820 car parks.

From the early stages of design and development **Versalux** and **BCA Engineers** worked closely together to devise a cutting-edge lighting solution for the entire facility – patient rooms, corridors, reception areas, lounges, outdoor gardens walkways and operating theatres – tailored to meet the needs of its state-of-the-art medical resources.
